SERVICE

SUSTAIN

Asset management software built for the waste industry by the waste industry.

CartLogic™, designed for you by Cascade Cart Solutions, is a Web-based, cloud-managed asset management solution for tracking, maintaining and reporting on your entire cart fleet.

What's up with your cart fleet? Now you can see your cart data from production to the curb, and efficiently manage those assets throughout their useful lives.

Your cart inventory and service information will be:

- Managed in one place
- Available in real-time from anywhere with an Internet connection
- Accessible to multiple employees simultaneously
- Automatically compiled into downloadable reports
- Cloud-managed, allowing us to bring you data security and automatic updates

Improve your customer service and inventory management with the same online tool!
