## Kitchen Organics Container

Cascade offers the industry's best kitchen organics container for your in-home food scrap collection needs. The Sure-Close container's unique design includes patented interior airflow channels that ensure food scraps remain aerated and odor free. Neutral color options, two removable lid options, and an optional wall mount bracket makes this food waste container equally suitable for on-counter or in-cupboard use.

This pail's innovative, ergonomic design features make it easy to fill, carry, empty, and clean.

- Stay open hinged lid
- Wide opening with high backsplash
- Rugged, secure latch
- Interlocking, double seal technology
- Multiple carry options
- Dishwasher safe
- Made with odor and blemish resistant, recyclable HDPE

*From countertop to curb,  
Cascade offers a variety  
of right-sized containers for in-home  
organics to commercial food  
waste collection.*

**KITCHEN ORGANICS CONTAINER**

Kitchen food scrap collection containers are part of a proven program for effective household organics diversion. Ideal countertop or cupboard food waste containers provide maximum usability when filling, carrying, emptying, and cleaning in addition to being visually appealing for any kitchen worksurface. Cascade offers the Sure-Close indoor compost collection container because it meets all of these requirements and more!

The innovative Sure-Close removable, hinged lid design provides maximum odor control. The lid's small ventilation holes and interior airflow channels allow air to circulate through the container. Moisture evaporates out through the lid, which dries food scraps and prevents odor-causing bacteria.

Sure-Close in-home compost collection containers ensure:

- Reduced odor
- No wet lids
- Reduced weight due to moisture evaporation

SPECIFICATIONS
